

QC 8.2: BPT Hands-On Lab

QC82LAB

Course Overview

A one day course.

This one-day hands-on lab is the culmination of the QualityCenter BPT Suite, as students apply the skills they learned during the week to a project-oriented scenario. Working in teams, and starting from an existing requirements document, students create components, test cases, test sets, and defect entries as they test and evaluate a working application. This highly structured experience is the perfect way to ensure a functional understanding of using Business Process Testing in QualityCenter.

Prerequisites

- Quality Center 8.2 Using TestDirector with Business Process Testing
- Quality Center 8.2 Using QuickTest Professional 8.2 with Business Process Testing

Who should attend?

- Business Systems Analysts
- Quality Center Project Managers
- Quality Assurance Engineers
- Other Quality Center Users
- Quality Testers

Objectives

On completion of this course, delegates will be able to:

- Create components, Test cases, Test sets and defect entries by working as a team to test and evaluate a working application.
